DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with R. Silverman on 12/11/04.

The application has been amended as follows:

In claim 9, line 3, after "to" **delete** "1000%".

In claim 9, line 3, after "to" **add** "100%".

Allowable Subject Matter

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: Ehrhardt et al (US 6,585,933 A), the closest prior art, teaches a method and composition for controlling

Art Unit: 1751

corrosion of metals, particularly ferrous-based metals in contact with aqueous systems is disclosed, which includes treating industrial waters with a combination of a tetrazolium salt and at least one other aqueous system treatment material, which may further contain an anionic surfactant, a carbamate, an amine, a triazole and an alkylene glycol.

The reference fails to teach the anionic surfactant is a sulfonated polyglycol nor the instantly claimed compounds, the specific structure a carbamate, that the amine is aromatic nor the amounts for each of the compounds required.

Therefore it would not have been obvious to one of ordinary skill in the art at the time the invention was made to create an antifreeze comprising (a) the sulfonated or sulfated polyglycol expressed by the following formula $R-(O)_1-(A-O)_m-(CH_2)_k-SO_3X$ at ratio of 0.05 to 10wt%, (b) one or ≥ 2 kinds of the carbamates expressed by a Formula (1) or corresponding ammonium salts at a ratio of 0.05 to 5wt%, (c) an aliphatic or aromatic amine at a ratio of 0.05 to 5wt%, (d) hydrocarbon-triazole at a ratio of 0.01 to 1wt%, and (e) alkylene glycol at a ratio at which the total is made into 100wt%, in view of Ehrhardt or any other prior art of reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
